Girl's family and pets make a discovery on a local beach

One day, when Yoshi, mom, Laggie, and Grillo were beach combing for brightly colored sea glass, they found a shiny green object that stood out from all the other pieces. When they brought it home, dad said it looked like a gem, more valuable than the others.

'Alien Girls' dramatizes how friendships deteriorate as life's circumstances change

The big reveal is two friends sharing news. Tiffany is pregnant, and what should be a moment of joy instead alienates her best friend, Carolyn. Carolyn's news of being published in a magazine feels secondary by comparison. She tries to be supportive, but her reaction is more complicated than she can admit even to herself.

Scripps Ranch Theatre director Drexler praises San Diego's cooperation among theatre companies

Currently, SRT is partnering with Roustabouts to produce Noel Coward's *Private Lives*. This arrangement is not unusual, and area theatres often share set designers, props, wigmakers. (Eva Trieger)

Poetry: What connects all humans?

And the question
the same one
running through every generation,
every body,
every breath:

What connects all humans?

A Special Mother's Day of hope: A message gleaned from a very serious wind accident

Suddenly an unexpected gale force wind came along and lifted me from the sidewalk and hurled me 15 feet into the street, right into the path of oncoming traffic. I tried to stand up but my right leg collapsed, feeling like an empty airbag. My hip joint shattered from the fall and I was now stuck on the ground.

Today's Jewish birthday: Steven Weinberg

Steven Weinberg (May 3, 1933 – July 23, 2021) was an American theoretical physicist. He shared the 1979 Nobel Prize in Physics with Abdus Salam and Sheldon Glashow "for their contributions to the theory of the unified weak and electromagnetic interaction between elementary particles, including, inter alia, the prediction of the weak neutral current".
